### Supplies

Found Objects, Paper

### Instructions

**Step 1:** Landscapes are comprised of three major components; sky, land and a horizon line which separates the two. What kind of landscape will you create; mountains, a forest, something else?

**Step 2:** Search for materials for your landscape assemblage. Explore your house or with a parent or guardian's permission explore your backyard or neighborhood. Look for materials that you can use to create the sky, land and horizon line. Think about the colors and textures of the materials you collect.

**Step 3:** Once you have collected materials for your landscape find a place to set up your assemblage. You can create your landscape on a piece of paper, on the floor or on a table or desk.

**Step 4:** Think about how you can arrange materials to create the sky, land and horizon line. What are the colors and textures of the materials that you have collected? How can you use these characteristics to represent details of your landscape?

**Step 5:** Take pictures of your landscape and share them with your friends and family.

### Vocabulary

**Found object** — a thing that someone else has given or thrown away that is often repurposed by artists

**Landscape** — an image of the land, nature, or outside; genre of art

**Horizon line** — is a line that runs across an artwork and represents the viewer's eye level or marks where the sky meets the ground
